

Water Saving Devices Details

Kitchen Faucet Aerators

Has a single and multiple stream spray with an on/off fingertip control lever to reduce and increase the spray.

Bathroom Faucet Aerators

1.5 GPM

Old aerators use up to 12 GPM

5 Position Spray Nozzles

For use on lawns and gardens. Saves water by cutting off hose water that would normally run if left unattended.

Hose Timers

Shuts off water after a set amount of time elapses. Used in lawns and gardens.

Eliminates forgetting to turn off the water when irrigating.

Rain Gauge

Measures the amount of moisture the lawn has received. Can help determine if lawn needs water. With the tendencies for clayey soils in Moscow, it is usually recommended to keep about 0.5 inches of precipitation in the soil. More soil moisture than that can lead to unwanted fungal growth and drowning of plants. The amount of precipitation necessary depends on the soil type, health, and plants.

Showerheads

2.0 GPM

Old showerheads use up to 15 GPM.

Handheld showerheads are also available for people unable to use stationary showerheads.

Shower Shutoff Valve

Shuts off water while soaping up. Water remains at the same temperature when turned back on for rinsing.

Toilet Tank Banks

Reduces the water by up to 1 gallon per flush. This is done by displacing water in the toilet tank.

Toilet Dye Tablets

Used to find a leaking flapper in toilets. Put the dye tablets in toilet tank and wait approximately 15 minutes. If the water turns blue your flapper is leaking and should be replaced. **A leaking flapper can waste up to 300 gallons of water per day!**

5 Minute Shower Timer

Helps to keep track of water used in the shower. Great tool for children or anyone interested in cutting the water spent in showering.

Irrigation System Rain Shutoff

This device is designed to shut off automatic irrigation systems when dish has accumulated a set amount of rainfall and reactivate when the water has evaporated.

Where our Devices come from:

Our Devices our currently being ordered from two companies. Irrigation system shutoff?

From AM Conservation (www.amconservationgroup.com)

- Shower Diverter Valves

From Horizon (5214 S. 30th Street, Pheonix, AZ 85040)

- Irrigation System Rain Shutoff

From Niagara Conservation (<http://www.niagaraconservation.com>) we order:

- 5 Minute Shower Timer
- Toilet Dye Tablets
- Toilet Tank Banks
- Shower Shutoff Valves
- Showerheads
- Rain Gauges
- Kitchen Faucet Aerators
- Bathroom Faucet Aerators
- Handheld Showerheads
- 5 Position Spray Nozzles
- Hose Timers

This is not a conclusive list of water saving device vendors. This is also not an endorsement of products. Low water use devices are available locally and on order. Here is a list of some local businesses that carry similar (but not identical) products to what the City gives away:

JJ Building Supplies

McCoy Heating and Plumbing

Moscow & Pullman Building Supplies

Spence True Value Hardware

Tri-State

Walmart
